The Resistance (Declaration) By Gemma Malley

The year is 2140. Peter and Anna are living freely on the Outside, trying hard to lead normal lives, but unable to leave the terror of the Declaration--and their experiences as surpluses--completely behind them. Peter is determined to infiltrate Pharma Corporation, which claims to have a new drug in the works; "Longevity +" will not just stop the ravages of old age, it might just reverse the aging process. But what Peter and Anna discover behind the walls of Pharma is so nightmarish it makes the prison of their childhood seem like a sanctuary: for it seems the only way to regain youth is to harvest the young.

Editorial Review

From School Library Journal

Grade 7 Up—In this gripping, stand-alone sequel to *The Declaration* (Bloomsbury, 2007), teenagers Anna and Peter have escaped Grange Hall, a prisonlike dormitory for Surpluses—children living in the United Kingdom in 2140 where childbirth is illegal and longevity drugs allow people to live forever. Anna's parents were overjoyed to have her back but were forced to commit suicide ("a life for a life") in order to give Anna and her baby brother a chance to become Legals. Her boyfriend, Peter, accepts a job working at Pincent Pharma, the Longevity drug company owned by his wicked grandfather, in order to help the Underground (a resistance group) destroy it. His unexpected ally is his Legal teenage half brother Jude, a talented computer hacker. The author addresses the moral and ethical implications of immortality in this dystopian novel, making it a great choice for group discussions. The writing style is not particularly lyrical but the fast pace and exciting plot make it a page-turner that will appeal to graduates of Margaret Peterson Haddix's "Shadow Children" series (S & S).—Sharon Rawlins, New Jersey State Library, Trenton

From Booklist

With the advent of a drug called Longevity, people have achieved the impossible: eternal life. But when people live forever, there is no room for new life, so those who take Longevity relinquish reproduction—a life for a life. Those who don't are arrested, their children taken to Surplus halls, where they atone for their parents by becoming Useful. In *The Declaration* (2007), Surplus Peter and Surplus Anna escaped from one of these halls, but their problems were only beginning. Now Legal, they work for the Underground, and at their request, Peter joins Pincent Pharma under his hated grandfather, the developer of Longevity. Pressured to take the drug and confronted with challenging arguments, Peter's finds that his mission is becoming a minefield of temptation and self-doubt—and then he learns the horrifying truth about new and improved Longevity. While the pure evil of Peter's grandfather undercuts Malley's otherwise nuanced presentation, she explores the far-reaching effects of Longevity with harrowing accuracy. Peter and Anna, both fighting for their right to be alive, are sympathetic focal points from which to tell this compelling story. Grades 9-12.
