Comparison of Permeability in Constant Head and Falling Head Method: Comparison of Permeability in Constant Head and Falling Head Method and Establishment of Empirical Relationship between them By Sadia Afrin Asha

The study was done with Sylhet Sand. Same soil sample was prepared by air pluviation from different height and same soil sample was prepared by temping. Each time the soil density was expected to be changed. After this treatment, the specimens that were prepared by this soil sample subjected to constant head and variable head permeability test. At first soil's specific gravity and maximum and minimum density was measured and during permeability tests, sample's void ratio, density as well as relative density was measured. Coefficient of permeability Vs void ratio, coefficient of permeability Vs relative density and coefficient of permeability Vs density was plotted. The change of permeability with the change of void ratio, density as well as relative density is linear in the case of constant head method and falling head method.

Editorial Review

About the Author

Sadia Afrin Asha Civil Engineer (BSc. Engg.) Bangladesh University of Engineering & Technology (BUET), Dhaka, Bangladesh.

Users Review

From reader reviews:

Alfred Greenwell:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The info you get based on what kind of book you read, if you want drive more knowledge just go with education and learning books but if you want feel happy read one with theme for entertaining for instance comic or novel. Typically the Comparison of Permeability in Constant Head and Falling Head Method: Comparison of Permeability in Constant Head and Falling Head Method and Establishment of Empirical Relationship between them is kind of e-book which is giving the reader erratic experience.

James Ensor:

People live in this new moment of lifestyle always try to and must have the time or they will get large amount of stress from both everyday life and work. So , whenever we ask do people have extra time, we will say absolutely indeed. People is human not really a robot. Then we request again, what kind of activity do you possess when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you try this one, reading books. It can be your alternative with spending your spare time, often the book you have read is definitely Comparison of Permeability in Constant Head and Falling Head Method: Comparison of Permeability in Constant Head and Falling Head Method and Establishment of Empirical Relationship between them.

Sandra Kelley:

Your reading 6th sense will not betray anyone, why because this Comparison of Permeability in Constant Head and Falling Head Method: Comparison of Permeability in Constant Head and Falling Head Method and Establishment of Empirical Relationship between them publication written by well-known writer who knows well how to make book that can be understand by anyone who also read the book. Written with good manner for you, still dripping wet every ideas and producing skill only for eliminate your personal hunger then you still hesitation Comparison of Permeability in Constant Head and Falling Head Method: Comparison of Permeability in Constant Head and Falling Head Method and Establishment of Empirical Relationship between them as good book not simply by the cover but also by content. This is one publication

that can break don't judge book by its cover, so do you still needing a different sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to an additional sixth sense.

Linda Barefoot:

What is your hobby? Have you heard that will question when you got students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person including reading or as studying become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you go onto be your object. One of them is this Comparison of Permeability in Constant Head and Falling Head Method: Comparison of Permeability in Constant Head and Falling Head Method and Establishment of Empirical Relationship between them.
