The Human Web: A Bird's-Eye View of World History By J. R. McNeill, William H. McNeill

Why did the first civilizations emerge when and where they did? How did Islam become a unifying force in the world of its birth? What enabled the West to project its goods and power around the world from the fifteenth century on? Why was agriculture invented seven times and the steam engine just once?

World-historical questions such as these, the subjects of major works by Jared Diamond, David Landes, and others, are now of great moment as global frictions increase. In a spirited and original contribution to this quickening discussion, two renowned historians, father and son, explore the webs that have drawn humans together in patterns of interaction and exchange, cooperation and competition, since earliest times. Whether small or large, loose or dense, these webs have provided the medium for the movement of ideas, goods, power, and money within and across cultures, societies, and nations. From the thin, localized webs that characterized agricultural communities twelve thousand years ago, through the denser, more interactive metropolitan webs that surrounded ancient Sumer, Athens, and Timbuktu, to the electrified global web that today envelops virtually the entire world in a maelstrom of cooperation and competition, J. R. McNeill and William H. McNeill show human webs to be a key component of world history and a revealing framework of analysis. Avoiding any determinism, environmental or cultural, the McNeills give us a synthesizing picture of the big patterns of world history in a rich, open-ended, concise account.

Editorial Review

From Publishers Weekly

The spread of agriculture, the growth of world religions and the rise of European civilization to world dominance are some of the themes explored in this engrossing addition to the distinctive McNeill brand of broad-brush macro-history. The motor of history this time is the growing "web" of interactions-weaving together hunter-gatherer bands, then civilizations and finally the whole world-by which people, goods, diseases and ideas spread. As it binds ever more people ever more tightly, the web both brings them into conflict and lets them share and build on each other's achievements; thus Columbus's extension of the web to the Americas led to conquest but also to the exchange of New World potatoes and maize for Old World horses and smallpox. The father-son historian duo also revisit ideas from William's previous books, discussing the co-evolution of humans and microbes, the uneasy symbiosis between warrior elites and the farmers they protect and exploit, and the social solidarity imparted by group singing and dancing. More ecological than humanistic, the McNeill outlook sees conflict and cooperation as twin outcomes of the struggle for survival that drives developments in technology, political organization, social habits and even religious beliefs. This approach can be reductionist (Europe's vibrant civil society is said to spring from its use of mold-board plows); and as impersonal historical meta-agents go, the trendy "web" conceit is less substantive and fertile than other McNeill brainstormers. Still, this concise and beautifully written synthesis brims with revealing insights that make history comprehensible and enthralling. 25 illus., maps.

Review

A brilliant synthesis of world history...vivid and illuminating. -- *Foreign Affairs*, May/June 2003

Exhilarating If you read *The Human Web* you will never again look at a globe in the same way. -- *Fritz Lanham, Houston Chronicle*

[An] irresistably readable work of popular history...with colorful material about everything from...Genghis Khan to...global warming. -- *Los Angeles Times*, 30 April 2003

Users Review

From reader reviews:

Alberta Smith:

You could spend your free time to study this book this reserve. This *The Human Web: A Bird's-Eye View of World History* is simple bringing you can read it in the park your car, in the beach, train as well as soon. If you did not have got much space to bring the actual printed book, you can buy the e-book. It is make you easier to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Florence Adams:

You can get this The Human Web: A Bird's-Eye View of World History by visit the bookstore or Mall. Simply viewing or reviewing it can to be your solve problem if you get difficulties for ones knowledge. Kinds of this publication are various. Not only by means of written or printed but can you enjoy this book simply by e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.

Keith Reese:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book has been rare? Why so many issue for the book? But almost any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but additionally novel and The Human Web: A Bird's-Eye View of World History or others sources were given know-how for you. After you know how the great a book, you feel want to read more and more. Science guide was created for teacher or maybe students especially. Those books are helping them to add their knowledge. In other case, beside science e-book, any other book likes The Human Web: A Bird's-Eye View of World History to make your spare time more colorful. Many types of book like here.

Bruce Davis:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just little students that has reading's spirit or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that reading through is not important, boring along with can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this The Human Web: A Bird's-Eye View of World History can make you experience more interested to read.
