What Kind of Creatures Are We? (Columbia Themes in Philosophy) By Noam Chomsky

Noam Chomsky is widely known and deeply admired for being the founder of modern linguistics, one of the founders of the field of cognitive science, and perhaps the most avidly read political theorist and commentator of our time. In these lectures, he presents a lifetime of philosophical reflection on all three of these areas of research to which he has contributed for over half a century.

In clear, precise, and non-technical language, Chomsky elaborates on fifty years of scientific development in the study of language, sketching how his own work has implications for the origins of language, the close relations that language bears to thought, and its eventual biological basis. He expounds and criticizes many alternative theories, such as those that emphasize the social, the communicative, and the referential aspects of language. Chomsky reviews how new discoveries about language overcome what seemed to be highly problematic assumptions in the past. He also investigates the apparent scope and limits of human cognitive capacities and what the human mind can seriously investigate, in the light of history of science and philosophical reflection and current understanding. Moving from language and mind to society and politics, he concludes with a searching exploration and philosophical defense of a position he describes as "libertarian socialism," tracing its links to anarchism and the ideas of John Dewey, and even briefly to the ideas of Marx and Mill, demonstrating its conceptual growth out of our historical past and urgent relation to matters of the present.

Editorial Review

Review

Chomsky's writings invariably reflect the force of intellect and cogency of thought that befits one of the greatest thinkers of our times?this work is no exception.

(Robert May, Distinguished Professor of Philosophy & Linguistics, University of California, Davis)

Noam Chomsky is arguably the most influential thinker of our time, having made seminal contributions to linguistics and philosophy, as well as political and social thought. In one succinct and powerfully argued volume, he presents a synthesis of his key ideas.

(Howard Gardner, Hobbs Professor of Cognition and Education, Harvard University)

Noam Chomsky launches this remarkable discussion with the age old question, "What kind of creatures are we?" Thus begins an extended inquiry into human cognition that takes him from the ancients to contemporary theorists of language and science, to politics. Chomsky's erudition is formidable, and I read his disquisition with pleasure and many "aha' moments. But what stands out for me is his wisdom; he accepts that being mere biological creatures, there is much that we can never know, and yet he is deeply empathetic with us, his fellow creatures who must struggle and try to impact our world, even though we ultimately cannot know.

(Frances Fox Piven, Distinguished Professor of Political Science, Graduate Center of the City University of New York)

It's always spring in Mr. Chomsky's garden. Like John Ashbery, Noam Chomsky seems to come up with thoughts that are always fresh, unaffected by the polluting cliches that most of us inhale and exhale all day and night. To read his sentences is a life-giving elixir.

(Wallace Shawn, author, *Essays*)

Engaging.

(*Library Journal*)

Recommended.

(*Choice*)

A rewarding and challenging read.

(PsycCritiques)

About the Author

Noam Chomsky is professor emeritus of linguistics and philosophy at the Massachusetts Institute of Technology and has written and lectured widely on linguistics, philosophy, intellectual history, contemporary issues, international affairs, and U.S. foreign policy. He is the author of more than one hundred books.

Users Review

From reader reviews:

Lanita Hill:

Nowadays reading books are more than want or need but also turn into a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want get more knowledge just go with education and learning books but if you want experience happy read one using theme for entertaining such as comic or novel. The What Kind of Creatures Are We? (Columbia Themes in Philosophy) is kind of guide which is giving the reader unforeseen experience.

Ward Bishop:

Information is provisions for people to get better life, information presently can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider when those information which is from the former life are challenging be find than now's taking seriously which one would work to believe or which one the actual resource are convinced. If you find the unstable resource then you understand it as your main information you will have huge disadvantage for you. All those possibilities will not happen inside you if you take What Kind of Creatures Are We? (Columbia Themes in Philosophy) as your daily resource information.
