Water Resources Planning and Management: Proceedings of the International Conference on Hydrology and Water Resources, New Delhi, India, December 1993 (Water Science and Technology Library) From Ingramcontent

Water is vital to life, maintenance of ecological balance, economic development, and sustenance of civilization. Planning and management of water resources and its optimal use are a matter of urgency for most countries of the world, and even more so for India with a huge population. Growing population and expanding economic activities exert increasing demands on water for varied needs--domestic, industrial, agricultural, power generation, navigation, recreation, etc. In India, agriculture is the highest user of water. The past three decades have witnessed numerous advances as well as have presented intriguing challenges and exciting opportunities in hydrology and water resources. Compounding them has been the growing environmental consciousness. Nowhere are these challenges more apparent than in India. As we approach the twenty first century, it is entirely fitting to take stock of what has been accomplished and what remains to be accomplished, and what accomplishments are relevant, with particular reference to Indian conditions.

Editorial Review

From the Publisher

This book will be of interest to researchers as well as to those engaged in practice of agricultural engineering, civil engineering, environmental engineering, ecological engineering, and earth sciences, forest resources, hydrology, and water resources.

About the Author

Dr. Vijay P. Singh is Arthur K. Barton Endowed Professor at Louisiana State University. Winner of more than 30 awards, he is a multi-faceted author, writing and co-authoring: 8 text books, 30 book chapters, numerous journal articles, conference proceedings papers and technical reports in the areas of hydrology, hydraulics, irrigation, and environmental engineering.

Professor J. H. Sonu is formerly President of Seoul National University, Seoul, Korea. Currently, he is President of Korea Water Resources Association as well Korea Society of Civil Engineers. He has authored numerous journal articles and technical publications. He has been honored many times both in Korea and abroad for his technical contributions.

Dr. I. W. Seo is professor of civil and environmental engineering in the School of Civil and Urban Infrastructure Engineering at Seoul National University. He is active in research in the area of hydraulics and environmental engineering and has authored numerous journal articles and conference proceedings papers.

Users Review

From reader reviews:

Brandi Anderson:

Water Resources Planning and Management: Proceedings of the International Conference on Hydrology and Water Resources, New Delhi, India, December 1993 (Water Science and Technology Library) can be one of your beginning books that are good idea. Many of us recommend that straight away because this book has good vocabulary that may increase your knowledge in vocabulary, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to get every word into enjoyment arrangement in writing Water Resources Planning and Management: Proceedings of the International Conference on Hydrology and Water Resources, New Delhi, India, December 1993 (Water Science and Technology Library) but doesn't forget the main level, giving the reader the hottest along with based confirm resource information that maybe you can be one among it. This great information can certainly drawn you into brand new stage of crucial imagining.

Michael Taylor:

Would you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you find out the inside because don't assess book by its cover may doesn't work at this point is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer may be Water Resources Planning and Management: Proceedings of the International Conference on Hydrology and Water Resources, New Delhi, India, December 1993 (Water

Science and Technology Library) why because the great cover that make you consider with regards to the content will not disappoint you. The inside or content will be fantastic as the outside or cover. Your reading 6th sense will directly show you to pick up this book.

Bryan Jones:

Reading a book to get new life style in this 12 months; every people loves to learn a book. When you examine a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, along with soon. The Water Resources Planning and Management: Proceedings of the International Conference on Hydrology and Water Resources, New Delhi, India, December 1993 (Water Science and Technology Library) offer you a new experience in reading through a book.

Refugio Kennedy:

Is it an individual who having spare time then spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Water Resources Planning and Management: Proceedings of the International Conference on Hydrology and Water Resources, New Delhi, India, December 1993 (Water Science and Technology Library) can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these books have than the others?
