The Universe By Seymour Simon

Imagine the biggest thing you can think of—now imagine something bigger that hasn't even stopped growing. That is the universe. Our own galaxy, the Milky Way, though enormous, is a tiny speck among the 100 billion galaxies containing nebulas, planets, "space pods," billions of stars, and black holes that fill the cosmos. New stars, planets, and galaxies continue to form as the universe expands. Award-winning science writer Seymour Simon brings you deep into the universe to explore this immense topic.

Editorial Review

From School Library Journal

Grade 3-6ASimon offers what amounts to an introduction to his long running, literally and figuratively stellar series of photo-essays on matters astronomical. Matching full-color, full- and double-page-spread-sized light and radio photographs of nebulas, galaxies, and sundry deep-space phenomena with two or three paragraphs of explanatory text, he covers a wide range of topics, from the Big Bang to quasars, from star formation to extrasolar planets. Care has been taken to keep the pictures and related text close together, and the choice of detail is guaranteed to whet youngster's appetites for a more thorough, narrowly focused treatment. Asking some of the Big QuestionsA "Does life exist on earth-like planets in distant solar systems? Will the universe expand forever or finally stop and then collapse into a gigantic black hole?"ASimon writes that "we are just at the beginning of a golden age of discovery." This book, along with the others that it leads to, will give children the solid background they will need to understandAand perhaps even participate inAthose discoveries.AJohn Peters, New York Public Library

Users Review

From reader reviews:

Marvin Perdue:

Book is to be different for each grade. Book for children right up until adult are different content. As we know that book is very important for us. The book The Universe seemed to be making you to know about other information and of course you can take more information. It is very advantages for you. The book The Universe is not only giving you much more new information but also to be your friend when you experience bored. You can spend your spend time to read your reserve. Try to make relationship with the book The Universe. You never sense lose out for everything in case you read some books.

Erica Logan:

Beside this The Universe in your phone, it could possibly give you a way to get closer to the new knowledge or details. The information and the knowledge you can got here is fresh from oven so don't always be worry

if you feel like an previous people live in narrow community. It is good thing to have The Universe because this book offers to you readable information. Do you often have book but you do not get what it's interesting features of. Oh come on, that will not happen if you have this in the hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss it? Find this book and also read it from right now!

James Esparza:

This The Universe is new way for you who has attention to look for some information mainly because it relief your hunger of information. Getting deeper you upon it getting knowledge more you know or you who still having little bit of digest in reading this The Universe can be the light food to suit your needs because the information inside this specific book is easy to get by simply anyone. These books produce itself in the form and that is reachable by anyone, yeah I mean in the e-book contact form. People who think that in publication form make them feel sleepy even dizzy this reserve is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for you. So , don't miss this! Just read this e-book variety for your better life as well as knowledge.

Macie Austin:

On this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple method to have that. What you should do is just spending your time not very much but quite enough to have a look at some books. One of many books in the top record in your reading list is definitely The Universe. This book which can be qualified as The Hungry Mountains can get you closer in getting precious person. By looking right up and review this guide you can get many advantages.
