### The Biology of the Deep Ocean (Biology of Habitats Series) By Peter Herring

This is an analysis of how conditions in the oceanic environment differ from those in the familiar terrestrial world, describing the techniques and ingenuity required to reveal the populations inhabiting the colossal volume of the deep oceans and how its inhabitants have adapted to survive and flourish within it. Many issues of deep sea marine life are covered including: surface phytoplankton's roles; chemosynthesis at hydrothermal vents and cold seeps; reduction of biomass with depth and energy conservation; mechanoreception; chemoreception; vision; animal life styles, seasonability, sex and size; and the unique variety of life in the deep ocean both on the sea floor at in midwater.

### Editorial Review

#### Review

"Herring's extensive experience on research cruises is evident as he smoothly guides the reader through 'uncharted waters'. There are many excellent diagrams and photo illustrations. . . . strongly recommended."--*Biologist*

#### About the Author

Peter Herring is at Southampton Oceanography Centre, UK.

### Users Review

#### From reader reviews:

##### Robert Clift:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite book and reading a guide.
