**The Brain and Behavior: An Introduction to Behavioral Neuroanatomy (Cambridge Medicine (Paperback))** By David L. Clark, Nash N. Boutros, Mario F. Mendez

Now in its third edition, *The Brain and Behavior* continues on its mission to present a simplified and accessible introduction to behavioral neuroanatomy. Human behavior is a direct reflection of the anatomy of the central nervous system, and it is the goal of the behavioral neuroscientist to uncover its neuroanatomical basis. Much of the new content in this edition reflects advances in functional magnetic resonance imaging. The text is presented in a highly structured and organized format to help the reader distinguish between issues of anatomical, behavioral and physiological relevance. Simplified and clear diagrams are provided throughout the chapters to illustrate key points. Case examples are explored to set the neuroanatomy in the context of clinical experience. This will be essential reading for behavioral clinicians including psychiatrists, neuropsychiatrists, neurologists, psychologists and clinical neuroscientists.

## **Editorial Review**

### **Review**

"This third edition should be required reading for all psychiatry residents and psychiatrists. The information it provides is needed to practice psychiatry for the next few decades."

--Doody's Review Service

### **From the Back Cover**

This book, developed by a neuroanatomist and a psychiatrist, is the first anatomy text to acknowledge the growing acceptance of an inextricable link between the "organic" and behavioral dimensions of medicine. In spite of the explosion of information associated with the new neuropsychiatry, spurred by advances in brain imaging, brain "mapping" and research in neurochemistry, there is no textbook of neuroanatomy that embraces this new approach to psychiatric disorders. *Behavioral Neuroanatomy* will serve as a short course or review on the structure and function of the central nervous system and its clinical relevance to diagnosing and managing mental illness.

### **About the Author**

David L. Clark is Associate Professor Emeritus, Division of Anatomy, The Ohio State University, Ohio, USA.

Nashaat N. Boutros is Professor of Psychiatry and Neurology and Associate-Chair for Research, Wayne State University, Detroit, USA.

Mario F. Mendez is Director, Neurobehaviour Unit, Greater Los Angeles Healthcare System and Professor of Neurology and Psychiatry, David Geffen School of Medicine, University of California, Los Angeles, USA.
