The Logic of Life By François Jacob

In *The Logic of Life* François Jacob looks at the way our understanding of biology has changed since the sixteenth century. He describes four fundamental turning points in the perception of the structure of living things: the discoveries of the functions of organs, cells, chromosomes and genes, and DNA.

Editorial Review

Review

"Brilliant. . . . One thing the book reveals to the general reader is the interconnection of the development of biological ideas with the development of the rest of science and technology."--**Jeremy Bernstein, *The New Yorker***

"[A] lucid account of man's changing ideas about heredity. [It] seizes and stimulates the imagination."--**Arnold W. Ravin, *Science***

"François Jacob, who won the Nobel Prize in 1965 for his work on genetics, has written an unusual and illuminating history of his discipline. It is not so much a history of science as a history of the ideas of science."--**Edward Edelson, *Washington Post Book World***

"[One of] the most important discussions yet published of the recent advances in molecular biology."--***The Times Literary Supplement***

Language Notes

Text: English (translation)

Original Language: French

From the Back Cover

"The most remarkable history of biology that has ever been written."--**Michel Foucault**

"A great story. . . . A compact encyclopedia of biology, it manages to convey, for all the weight of its content, a sense of continual excitement and wonderment."--**Lewis Thomas, author of *The Lives of a Cell***

Users Review

From reader reviews:

Gerald James:

Have you spare time for any day? What do you do when you have much more or little spare time? Yes, you can choose the suitable activity intended for spend your time.
