

## Building Tablet PC Applications (Developer Reference)

By Rob Jarrett, Phillip Su

**Building Tablet PC Applications (Developer Reference)** By Rob Jarrett, Phillip Su

Many pen-based software platforms have been introduced in the last decade, but only recently has the introduction of faster processors and hardware enabled mainstream introduction of tablet-sized pen-based PCs. This book tackles the challenge of writing compelling Tablet PC software on two fronts. First, it distills decades of usability research into pen-based computing to present an authoritative discussion of the optimal design of pen-based user interfaces. Second, it provides an in-depth exposition of the Tablet PC Ink SDK, complete with tips and tricks on how developers can produce the most powerful and natural “ink-aware” applications.

- Distills decades of usability research into pen-based software to present an authoritative discussion of the optimal design of pen-based user interfaces
- Provides an in-depth exposition of the TabletPC Ink SDK, complete with tips and tricks on how developers can produce the most powerful and natural pen-based, “ink-aware” applications
- Co-written by the lead software developer on the Microsoft TabletPC team

### **Editorial Review**

#### **About the Author**

Rob Jarrett works as a software design engineer at Microsoft in the Tablet PC group working on tablet input, real-time inking, and the ink interaction model in the Tablet PC platform. Rob holds a B.S. degree in computer science, graduating with honors from McMaster University (Hamilton, Ontario, Canada) in 1992. Areas of interest for Rob include music composition, audio engineering, classic arcade games, and really bad films.

Philip Su is a lead developer at Microsoft in the Tablet PC group, working on integration of the Tablet PC platform into Microsoft Journal software. Previously, he worked as a lead developer on Microsoft Money and as a software design engineer on Microsoft Word. Philip is also the founder and CEO of Sonetics Software, LLC, a company that specializes in digital audio software. Philip has won numerous awards, including the prestigious National Science Foundation Graduate Fellowship as well as the Maryland Technical Invention of the Year Award. His areas of interest include discrete digital audio processing, multimodal user interfaces, and digital media. He holds dual B.S. degrees in computer science and neurobiology, graduating summa cum laude from University of Maryland.

### **Users Review**

#### **From reader reviews:**

##### **Jeffrey Brown:**

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite book and reading a reserve. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled Building Tablet PC Applications (Developer Reference). Try to make the book Building Tablet PC Applications (Developer Reference) as your good friend. It means that it can to become your friend when you experience alone and beside that course make you smarter than ever. Yeah, it is very fortuned to suit your needs. The book makes you far more confidence because you can know every thing by the book. So , let's make new experience in addition to knowledge with this book.

##### **Brian Roberts:**

People live in this new time of lifestyle always try to and must have the extra time or they will get great deal of stress from both day to day life and work.
