Editorial Review

Review

"Public libraries and school libraries will benefit from all the ideas included and, as many of these are intergenerational, college libraries might also benefit from some of these activities as outreach techniques - **ARBA**

"This is a tremendously useful guide for librarians interested in passive programming or upgrading their programming practices. . . . This guide enables personalization by asking programming librarians to make choices, rather than presuming there are one-size-fits-all library programs. I found myself wishing that there were even more programs in the book." - **Library Media Connection**

"Stuck in a programming rut? If you're looking for ideas and inspiration to reinvigorate your programming, this volume is a great place to start. . . . Recommended for public librarians serving all ages." - **Booklist Online**

About the Author
