Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence)

From Song Houbing

Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) From Song Houbing

Cyber-Physical Systems: Foundations, Principles and Applications explores the core system science perspective needed to design and build complex cyber-physical systems. Using Systems Science's underlying theories, such as probability theory, decision theory, game theory, organizational sociology, behavioral economics, and cognitive psychology, the book addresses foundational issues central across CPS applications, including System Design -- How to design CPS to be safe, secure, and resilient in rapidly evolving environments, System Verification -- How to develop effective metrics and methods to verify and certify large and complex CPS, Real-time Control and Adaptation -- How to achieve real-time dynamic control and behavior adaptation in a diverse environments, such as clouds and in network-challenged spaces, Manufacturing -- How to harness communication, computation, and control for developing new products, reducing product concepts to realizable designs, and producing integrated software-hardware systems at a pace far exceeding today's timeline. The book is part of the *Intelligent Data-Centric Systems: Sensor-Collected Intelligence* series edited by Fatos Xhafa, Technical University of Catalonia.

Indexing: The books of this series are submitted to EI-Compendex and SCOPUS

- Includes in-depth coverage of the latest models and theories that unify perspectives, expressing the interacting dynamics of the computational and physical components of a system in a dynamic environment
- Focuses on new design, analysis, and verification tools that embody the scientific principles of CPS and incorporate measurement, dynamics, and control
- Covers applications in numerous sectors, including agriculture, energy, transportation, building design and automation, healthcare, and manufacturing

Editorial Review

About the Author

Houbing Song received the Ph.D. degree in electrical engineering from the University of Virginia, Charlottesville, VA, in August 2012, and the M.S. degree in civil engineering from the University of Texas at El Paso, TX, in December 2006. In August 2012, he joined the Department of Electrical and Computer Engineering, West Virginia University, Montgomery, WV, where he is currently an Assistant Professor and the founding director of the Security and Optimization for Networked Globe Laboratory (SONG Lab, www.SONGLab.us), and West Virginia Center of Excellence for Cyber-Physical Systems sponsored by West Virginia Higher Education Policy Commission. He served as an engineering research associate at Texas A&M Transportation Institute in 2007. His research interests lie in the areas of cyber-physical systems, internet of things, cloud computing, big data analytics, connected vehicle, wireless communications and networking. Dr. Song's research has been supported by the West Virginia Higher Education Policy Commission. Dr. Song was the first recipient of Golden Bear Scholar Award, the highest faculty research award at WVU Tech. Dr. Song is a senior member of IEEE and a member of ACM.

Danda B. Rawat is an Associate Professor in the Department of Electrical Engineering and Computer Science at Howard University, Washington DC, USA. Dr. Rawat's research focuses on wireless communication networks, cybersecurity, cyber physical systems, internet of things, big data analytics, wireless virtualization, software-defined networks, smart grid systems, wireless sensor networks, and vehicular/wireless ad-hoc networks. His research is supported by US National Science Foundation, University Sponsored Programs and Center for Sustainability grants. Dr. Rawat is the recipient of NSF Faculty Early Career Development (CAREER) Award. Dr. Rawat has published over 100 research articles and 8 books. He has been serving as an Editor/Guest Editor for over 10 international journals. He serves as a Web-Chair for IEEE INFOCOM 2016/2017, served as a Student Travel Grant Co-Chair of IEEE INFOCOM 2015, Track Chair for wireless networking and mobility of IEEE CCNC 2016, Track Chair for Communications Network and Protocols of IEEE AINA 2015, and so on. He served as a program chair, general chair, and session chair for numerous international conferences and workshops. He is the recipient of Outstanding Research Faculty Award (Award for Excellence in Scholarly Activity) 2015, Allen E. Paulson College of Engineering and Technology, GSU among others. He is the Founder and Director of the Cyber-security and Wireless Networking Innovations (CWiNs) Research Lab. Between 2011 and 2016, Dr. Rawat was with Geoeria Southern University and Eastern Kentucky University. Dr. Rawat is a Senior Member of IEEE and an Member of ACM and ASEE.

Sabina Jeschke is head of the institute cluster IMA/ZLW & IfU at the RWTH Aachen University since 2009. She studied Physics, Computer Science and Mathematics at the Berlin University of Technology. After research stays at the NASA Ames Research Center/ California and the Georgia Institute of Technology/Atlanta, she gained a doctorate on "Mathematics in Virtual Knowledge Environments" in 2004. Following a junior professorship (2005-2007) at the TU Berlin with the construction and direction of its media center, she was head of the Institute of Information Technology Services (IITS) for electrical engineering at the University of Stuttgart from May 2007 to May 2009, where she was also the director of the Central Information Technology Services (RUS) at the same time. Her research areas are inter alia distributed artificial intelligence, robotics and automation, traffic & mobility, virtual worlds and innovation & future research. Sabina Jeschke is vice dean of the Faculty of Mechanical Engineering of the RWTH Aachen University, chairwoman of the board of management of the VDI Aachen and member of the supervisory board of the Körber AG. She is a member and consultant of numerous committees and

commissions, alumni of the German National Academic Foundation (Studienstiftung des deutschen Volkes), IEEE Senior and Fellow of the RWTH Aachen University. In July 2014, the Gesellschaft für Informatik (GI) honoured her with their award Deutschlands digitale Köpfe (Germany's digital heads). In September 2015 she was awarded the Nikola-Tesla Chain by the International Society of Engineering Pedagogy (IGIP) for her outstanding achievements in the field of engineering pedagogy.

Prof. Dr.-Ing. Christian Brecher has been the Ordinary Professor for Machine Tools at the Laboratory for Machine Tools and Production Engineering (WZL) of the RWTH Aachen as well as the Director of the Department for Production Machines at the Fraunhofer Institute for Production Technology IPT since January 1, 2004. Further, he is CEO of the Cluster of Excellence "Integrative Production Technology for High-Wage Countries" that is funded by the German Research Foundation (DFG). After finishing his academic studies in mechanical engineering, he started his professional career first as a research assistant and later as a team leader in the department for machine investigation and evaluation at the WZL. From 1999 to April 2001, he was responsible for the department of machine tools in his capacity as a Senior Engineer. After a short spell as a consultant in the aviation industry, Professor Brecher was appointed in August 2001 as the Director for Development at the DS Technologie Werkzeugmaschinenbau GmbH, Mönchengladbach, where he bore the responsibility for construction and development until December 2003. Prof. Brecher has received numerous honours and awards including the Springorum Commemorative Coin, the Borchers Medal of the RWTH Aachen, the Scholarship Award of the Association of German Tool Manufacturers (Verein Deutscher Werkzeugmaschinenfabriken VDW) and the Otto Kienzle Memorial Coin of the Scientific Society for Production Technology (Wissenschaftliche Gesellschaft für Produktionstechnik WGP). Currently he is chairman of the scientific group for machines of CIRP, the International Academy for Production Engineering.

Users Review

From reader reviews:

Maria Bruns:

This Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is actually information inside this publication incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) without we realize teach the one who studying it become critical in pondering and analyzing. Don't be worry Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) can bring when you are and not make your case space or bookshelves' become full because you can have it within your lovely laptop even cellphone. This Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) having fine arrangement in word in addition to layout, so you will not experience uninterested in reading.

Keiko Whitchurch:

Hey guys, do you would like to finds a new book you just read? May be the book with the name Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) suitable to you? Typically the book was written by well-known writer in this era. The

book untitled Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence)is the one of several books in which everyone read now. This book was inspired many men and women in the world. When you read this reserve you will enter the new age that you ever know prior to. The author explained their idea in the simple way, and so all of people can easily to comprehend the core of this publication. This book will give you a large amount of information about this world now. To help you see the represented of the world with this book.

Patsy Phan:

You are able to spend your free time you just read this book this guide. This Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) is simple to bring you can read it in the park your car, in the beach, train and soon. If you did not possess much space to bring the printed book, you can buy often the e-book. It is make you simpler to read it. You can save the actual book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Laura Dumas:

That e-book can make you to feel relax. This kind of book Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) was bright colored and of course has pictures on the website. As we know that book Cyber-Physical Systems: Foundations, Principles and Applications (Intelligent Data-Centric Systems: Sensor Collected Intelligence) has many kinds or type. Start from kids until teens. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book for you and try to like reading in which.
