Design of Low-Noise Amplifiers for Ultra-Wideband Communications (Electronics) By Roberto Díaz Ortega, Sunil Lalchand Khemchandani, Hugo García Vázquez, Francisco Javier del Pino Suárez

Cutting-edge techniques for ultra-wideband, low-noise amplifier design

This pioneering resource presents alternatives for implementing power- and area-efficient integrated low-noise amplifiers for ultra-wideband communications. Design methodologies for distributed amplifiers, feedback amplifiers, inductor structures with reduced area, and inductorless techniques are discussed. Cowritten by international experts in industry and academia, this book addresses the state of the art in integrated circuit design in the context of emerging systems.

Design of Low-Noise Amplifiers for Ultra-Wideband Communications covers:

- Ultra-wideband overview and system approach
- Distributed amplifiers
- Wideband low-noise amplifiers
- Feedback wideband low-noise amplifiers
- Inductorless techniques

Editorial Review

About the Author

Roberto Díaz Ortega was a researcher at the Institute for Applied Microelectronics at the University of Las Palmas de Gran Canaria, Spain.

Sunil L. Khemchandani is a senior researcher at the Institute for Applied Microelectronics and Associate Professor of Electrical Engineering in the Department of Electronic and Automatic Engineering at the University of Las Palmas de Gran Canaria, Spain.

Hugo García Vázquez is a researcher at the Institute for Applied Microelectronics at the University of Las Palmas de Gran Canaria, Spain.

Francisco Javier del Pino Suárez is a senior researcher at the Institute for Applied Microelectronics and Associate Professor of Electrical Engineering in the Department of Electronic and Automatic Engineering at the University of Las Palmas de Gran Canaria, Spain.

Users Review

From reader reviews:

Dolores Mann:

Book is written, printed, or highlighted for everything. You can realize everything you want by a e-book. Book has a different type. As you may know that book is important factor to bring us around the world. Beside that you can your reading ability was fluently. A e-book Design of Low-Noise Amplifiers for Ultra-Wideband Communications (Electronics) will make you to end up being smarter. You can feel more confidence if you can know about every thing. But some of you think that will open or reading some sort of book make you bored. It's not make you fun. Why they might be thought like that? Have you in search of best book or ideal book with you?

Patrice Eubanks:

Do you have something that you prefer such as book? The reserve lovers usually prefer to decide on book like comic, quick story and the biggest the first is novel. Now, why not hoping Design of Low-Noise Amplifiers for Ultra-Wideband Communications (Electronics) that give your enjoyment preference will be satisfied by reading this book. Reading practice all over the world can be said as the way for people to know world far better then how they react in the direction of the world. It can't be explained constantly that reading routine only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start examining as your good habit, you are able to pick Design of Low-Noise Amplifiers for Ultra-Wideband Communications (Electronics) become your own starter.

Marian Buell:

It is possible to spend your free time to learn this book this publication. This Design of Low-Noise Amplifiers for Ultra-Wideband Communications (Electronics) is simple to deliver you can read it in the recreation area, in the beach, train along with soon. If you did not get much space to bring the actual printed book, you can buy the particular e-book. It is make you quicker to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Stephanie Landa:

With this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple strategy to have that. What you are related is just spending your time very little but quite enough to have a look at some books. One of the books in the top checklist in your reading list will be Design of Low-Noise Amplifiers for Ultra-Wideband Communications (Electronics). This book which can be qualified as The Hungry Mountains can get you closer in getting precious person. By looking right up and review this reserve you can get many advantages.
